SUMMARY

- Professional software developer with around 3 years of experience developing Java-based projects, including designing, developing, implementing, and testing object-oriented applications and web-based enterprise applications utilizing Java/J2EE.
- Working knowledge of Agile (SCRUM) and Test-Driven Development (TDD) development approaches.
- HTML, CSS, JavaScript, jQuery, AJAX, and Bootstrap were used to design and construct user interfaces and web applications.
- Experience using the AWS Streamlining method for JavaScript project delivery by the SLA.
- Experience with relational databases such as MYSQL, Oracle, PostgreSQL, SQL, and NoSQL databases such as MongoDB.
- Created complicated SQL queries for extracting data from enormous datasets and later cleaned the data.
- Using Jenkins and Bamboo, I performed Continuous Integration (CI) and Continuous Deployment (CD).
- For feeding data into enterprise application user interfaces (UI), I wrote Java code and developed a new service utilizing RESTful API.

EXPERIENCE

Data Analyst

Prime 3 Software, VA

Jan 2021-Present.

Project: Courier Management System

Description: Courier Management System is a web-based project that is developed to support all the functionality related to the courier service business. The overall project is designed using the MVC pattern (MVC i.e. Model, View, and Controller). In the Backend, it is using Spring Boot, at the data access layer the project is using Hibernate Framework, and at the front, we are using HTML, CSS, and Bootstrap. The Database used here is MYSQL.

- Experience with project techniques such as Agile, Waterfall, and Scrum, as well as Test Driven Development (TDD).
- AJAX was utilized to build the back-end GUI, and JavaScript was used to create client-side validations and HTML pages.
- React was utilized to create a front-end application as well as a SPA.
- Using AWS services such as Lambda, S3, EC2, CloudFront, DynamoDB, and Docker containerization.
- Angular, UI-Router, and Custom Directive were used to create Single Page Applications.
- Using CSS, HTML, and JavaScript, I created dynamic and functioning pages.
- Hands-on experience with middleware technologies such as Spring Boot, WebLogic, Apache, Tomcat, JBoss, and others.
- Extensive experience in back-end application development using HTML, CSS, JavaScript, jQuery, and AJAX to create vivid, user-friendly, and high-performance web apps.

SOCIAL MEDIA MANAGER

Promolt, Reston, VA

Dec 2016 – Dec 2020.

- Increased customer engagement through social media.
- Monitored the online presence of the company's brand to engage with users and strengthen customer relationships.
- Developed marketing content such as blogs, promotional materials, and advertisements for social media.
- Developed and managed content calendars for each platform to establish timely and relevant posts.
- Increased followings of our clients from a few hundred to over 200,000 followings.

EDUCATION

High School Diploma

Penn Foster High School, Scranton, PA

SKILLS

Methodology: SDLC, Agile, Waterfall

Languages: Java, SQL, C/C++

Scripting language: Python, Unix, JavaScript

Frameworks: React, JSF, Hibernate

IDEs: NetBeans, IntelliJ IDEA

Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC

Back-end Frameworks: J2EE, Django, Spring Framework, Spring MVC, Spring Boot

Web Technologies: HTML, CSS, Bootstrap, jQuery, Ajax, JSON, XML

Application Server: Apache Tomcat, Web Sphere, NodeJS

Databases: MySQL, PostgreSQL, Mongo DB, Oracle

Build /Other tools: UML, MS Visio, Maven, Gradle

Version Control Tools: Git, GitHub

Operating Systems: Windows, Linux
